## PROJECTS

### • Event Management Project

- The Event Management Project is a web-based application designed to streamline event planning and management processes.
- Developed a web-based event management system to streamline event planning and management processes. The system allows organizers to create and manage events, administrators to approve and manage events, and users to register and attend events.
- Implemented features for event creation, payment management, booking requirements, and query management
- Integrated payment gateway with OTP verification.
- Created a web-based application with three panels: Organizer, Admin, and User.
  1. **Organizer Panel:** Allows organizers to create and manage events, including event details, payment methods, and booking requirements.
  2. **Admin Panel:** Enables administrators to approve and manage events, including pending payments, completed events, and booking requirements.
  3. **User Panel:** Allows users to register and attend events, including event information, payment, and mapping for event locations.

- I hereby solemnly declare that the information provided in this document is true, accurate, and complete to the best of my knowledge and belief.
